**PE EIS**
PEO Enterprise Information Systems

MISSION:

Delivers and supports innovative, adaptable, and efficient financial, acquisition, logistics, training and environmental enterprise business solutions enabling total force readiness.

VISION:

The recognized acquisition leader and trusted source of enhanced business systems capabilities that are intuitive, robust and revolutionary delivered at the speed of need.

Stakeholder

Our stakeholders are commands that have a vital interest in our business and its activities.

G-2 — Intelligence and Security (G-2)

DHA — Defense Health Agency (DHA)

DFAS — Defense Finance & Accounting Service (DFAS)

USACE — U.S. Army Corps of Engineers (USACE)

BUMED — Navy Bureau of Medicine and Surgery (BUMED)

AMC — Army Materiel Command (AMC)

Functional

The functional is our client and primary user of our products. A Functional can also be stakeholders.

ASA(ALT) — Assistant Secretary of the Army for Acquisition, Logistics, and Technology (ASA(ALT))

ASA(FM&C) — Assistant Secretary of the Army (Financial Management and Comptroller) (ASA*FM&C))

Deputy Assistant Secretary for Procurement (DASA-P)

TRADOC — U.S. Army Training and Doctrine Command (TRADOC)

G-9 — Department of the Army, Deputy Chief of Staff, G9

G-1   G-4   G-8   AAA   ACC   ARCYBER   CIO   DISA   FMCOM   INSCOM   MEDCOM   NETCOM   NGB   OBT   USAR

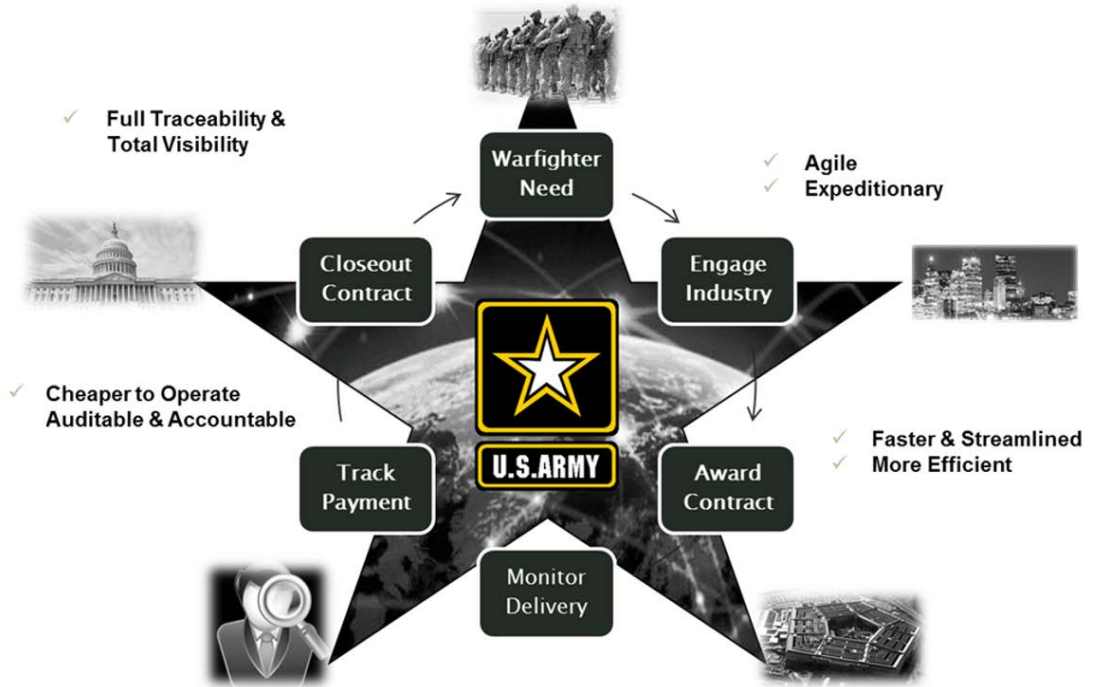

COL Donald L. Burton

ARMY CONTRACT WRITING SYSTEM (ACWS)

Army's next generation, single enterprise-wide, contract writing and management software system. Will provide full spectrum contract management, from requirements identification to close out. Replaces antiquated legacy systems – Standard procurement System, Procurement Automated Data and Document System, and Virtual Contracting Enterprise.

Integrated, Auditable, Data Driven, Commercial Off-the-Shelf Procurement Management System

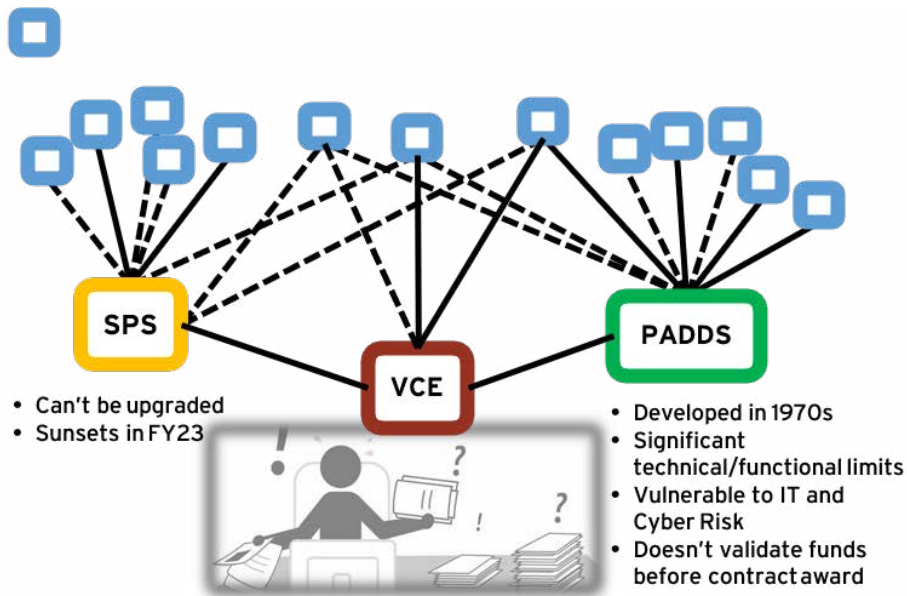

Benefits to the Soldier // Readiness

1. Expedites acquisition and contracting process; delivers warfighting capabilities to Soldiers faster
2. Secure Environment contracting to support Intelligence and Security Command global mission
3. Modernizes ability to award and sustain major weapon systems contracts by replacing legacy Procurement Automated Data and Document System
4. Provides efficiencies to the Army end user by streamlining and standardizing business processes
5. Supports approximately 10,000 Army end users at approximately 300 sites, executing all six functions in the contracting life cycle

Requirements Development → Solicitation → Source Selection → Award → Contract Admin → Contract Closeout

LTC Christee S. Cuttino
Product Manager

WHERE WE ARE

- Can't be upgraded
- Sunsets in FY23

SPS

VCE

PADDS

- Developed in 1970s
- Significant technical/functional limits
- Vulnerable to IT and Cyber Risk
- Doesn't validate funds before contract award

✖ **Obsolete Technology** – Antiquated legacy systems (Oldest 40+ Years)
✖ **Labor-intensive Data Transfer** – Combination of electronic, flat file, and manual entry
✖ **Disjointed Systems** – Multiple disparate databases and business systems
✖ **Poor Data Integrity** – Duplicate manual data entry into multiple systems

WHERE WE ARE HEADED

✓ **Standardization** – All Army contracting business processes are in a single COTS solution, cyber hardened, and upgradable
✓ **Data Visualization** – Single data source feeding the information requirements of both Army Leaders and the Army Contracting Enterprise
✓ **System Consolidation** – Collapsing 3 legacy contract writing systems into a modern integrated procurement management system leveraging a centralized data exchange

ARMY TRAINING INFORMATION SYSTEM (ATIS)

"We look forward to working with our industry partners to bring the warfighter a comprehensive training capability that will save resources and increase readiness."

ATIS:

- ATIS will deliver an Army enterprise capability to enable the Training Environment with a single system for scheduling, development, learning content management, training management and resource management for all individual and collective training and education.

- The Army Training Information System will deliver a customer focused, worldwide, adaptive Army Training Enterprise Capability to enable training readiness for the Total Force, anytime, anywhere

BENEFITS TO THE SOLDIER READINESS

Training Management

GENERAL FUND ENTERPRISE BUSINESS SYSTEM (GFEBS)

The General Fund Enterprise Business System (GFEBS) Implements the Army's core financial management system to provide distribution and execution of appropriated funds, cost management, and financial reporting. It also includes business functionality to manage Property, Plant and Equipment, and Operating Materiel and Supplies (OM&S).

- GFEBS manages 130 appropriations and obligated over $180B in FY2018, an amount that would place it in the top ten of the Fortune 500 companies in America!Used by over 34,000 Active/Reserve Army, National Guard and Department of Defense DoD users at over 200 locations across 71 countries

- Ensures Army is compliant with financial laws and over 2,000 regulations, standards, attributes and rules set by Treasury and Congress

- Supports the Army in meeting the Congressional mandate of auditability demonstrating financial responsibility over the taxpayer dollars

- Replaced, in full or in part, over 50 financial systems operating in excess of 40 years

Mr. Reginald A. Shuford
Product Director

Benefits to the Soldier // Readiness

SUPPORT   REFORM   MODERNIZE

The Systems Future: Modernize

GFEBS will enable leadership to find cost savings across the Army by eliminating manual processes, retiring legacy systems and providing the information necessary to compare organizational costs across the enterprise.
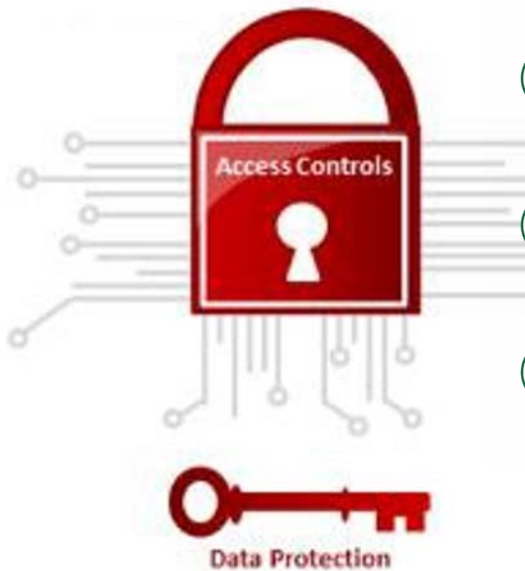

- Displace an additional 39 legacy systems
- Migrated data center hosting to the Cloud
- Became a Service Provider for DHA, USUHS & BUMED
- Enable GFEBS capability for Sensitive Activities
- FFMIA, BEA, and SFIS Compliant
- Obtain unqualified audit opinion
- Provide data analytics and reporting of all transactions to include financial and real property
- Provide full transparency, accountability and traceability

We are a financial management Enterprise Resource Planning (ERP) system for classified customers. It integrates the Army's enterprise-wide single foundation for financial and procurement management into high side operations while maximizing baseline commonality and maintaining data integrity.

General Ledger
Asset Accounting, Accounting Adjustments

Revenue and Accounts Receivable
Billing MIPR

Accounts Payable
Contracts, Disbursing, GPC, Payment Cert, Interfund, Travel, Transportation

Financial Reporting
Status of Funds, Departmental Reporting, Expenditure Reporting

Cost Management
Civilian Payroll, Labor and Timetracking

GFEBS-SA supports the Army's goal of improving audit readiness via financial processes, controls, and information.

FINANCIAL KEVLAR FOR OUR TIP-OF-THE-SPEAR WARRIORS!

- Solution for our Sensitive Activities organizations

- Fully Compliant Department of Defense (DoD) requirements

- Provides full transparency, accountability and traceability while providing cutting-edge data security

- Provide analytics-based reporting and forecasting

- Provide integrated decision-making

- Enables unqualified audit opinion for sensitive activities community

GFEBS-SA is modernizing critical infrastructure through an Army impact level 6 cloud implementation for the SA community

- First Impact Level 6 environment for the Army

- Certified to process information at classification levels up to SECRET

- implemented Amazon Web Services IaaS

US ARMY LOGISTICS MODERNIZATION PROGRAM (LMP)

- Delivers Army Readiness by equipping Soldiers where and when they need it

- Serves as the Army's National-level logistics system and Army Working Capital Fund financial management system of record

- Supports an adaptive and agile Army force through continuous process improvements and technical upgrades

CHARACTERISTICS/DESCRIPTION

- National-level component of the Integrated Army Logistics Enterprise; supports Army strategies

- Uses SAP ECC, SAP SCM, SAP EWM and SAP CAMS, SAP HANA

- Worldwide 24x7 Usage; near real-time asset visibility

- System of Record for AWCF

- Program in Capability Support Phase IAW DODI 5000.75

- Retired >60 legacy systems

SPECIAL FEATURES

- User base at 50+ Army and DoD locations

- Approximately 23,000 users

- 56 partner systems and 279 interfaces (Army and DoD)

- Manages $16B in AWCF inventory

- Handles over 7M transactions daily

- Clinger-Cohen Act compliant

- Risk Management Framework (RMF) certified

- Supports Financial Auditability

CAPABILITIES

- Integrated supply chain demand planning and execution solution

- Integrated logistics and financial processes

- Army industrial base operations – Manufacturing and Remanufacturing planning and execution

- Enhanced procurement of weapon systems, spares, and services

- Robust operational, analytical and strategic reporting

- Enables 9 of 16 DoD Enterprise E2E processes

- Standardized business processes and procedures across AMC

- Scalable and open architecture

If a Soldier shoots it, drives it, flies it, wears it, communicates with it, or eats it – AMC provides it...and LMP is behind it.
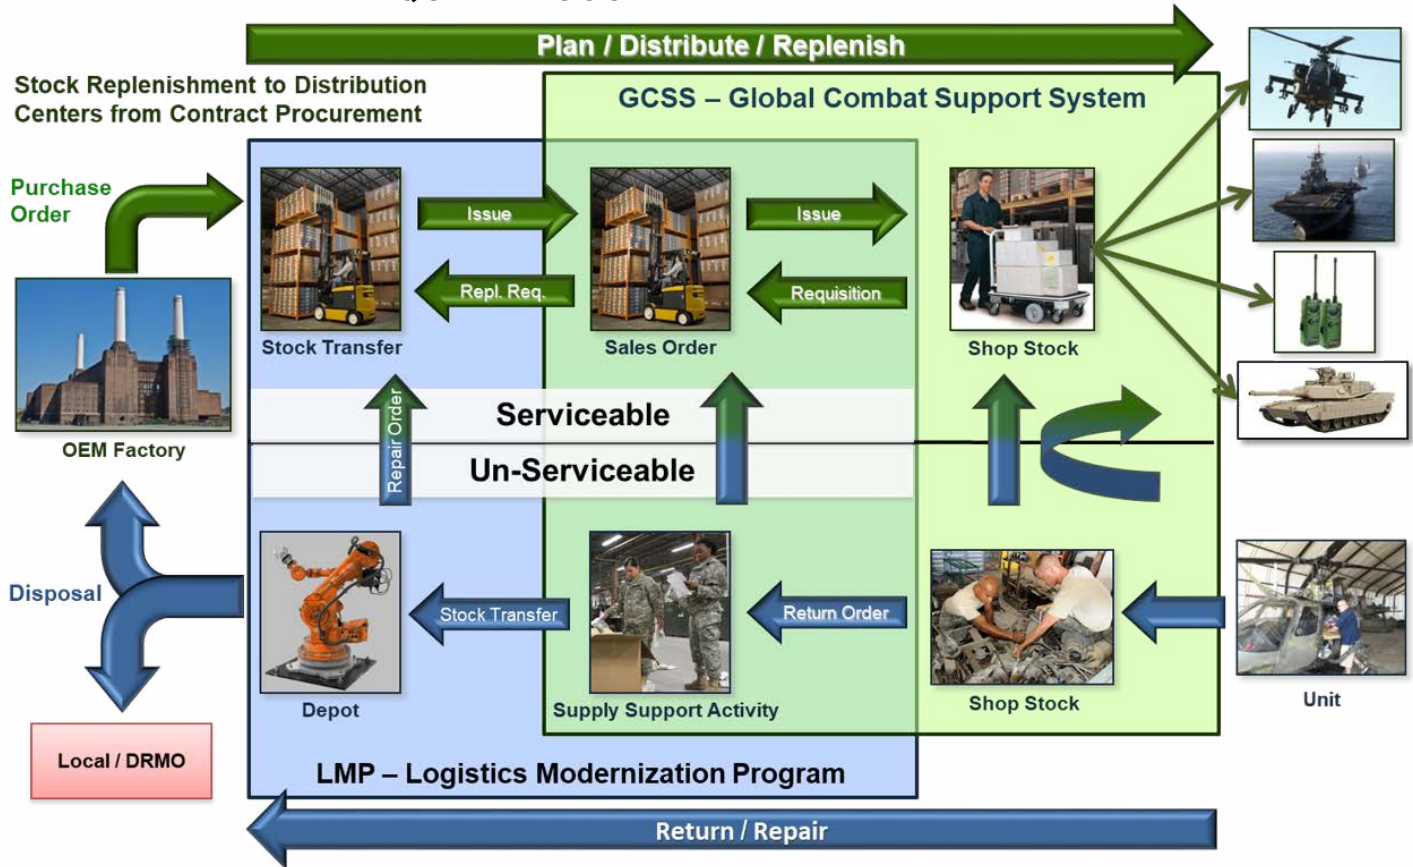

Mr. Gabriel T. Saliba
Product Director

BENEFITS TO THE SOLIDER

- Supports visibility of parts and material in the supply chain
- Provides equipment, parts, and materiel to the field quickly and efficiently
- Supports overall Army Readiness

THE SYSTEM'S FUTURE

The LMP will continue to support Army priorities through continuous improvements in support of Army Materiel Command's and the Army's missions.

- Continued process improvements to maintain relevance of solution
- Continued technical improvements to improve operational efficiency and reduce cost
- Support Army Data Analytics

Current projects include:

- Suite on HANA/Enhancement Pack 7 (FY21)
- Cloud Migration (FY21)

- Segregation of Duties (Phases 1 & 2) (FY21) (T)
- ServiceNow (FY22)
- Additive Manufacturing (FY21)
- LMP / Army Contract Writing System Integration (FY22)
- Implementation of PEO EIS Enterprise Tools
- Financial auditability changes

HEADQUARTERS ARMY ENVIRONMENTAL SYSTEM

HQAES
HEADQUARTERS ARMY ENVIRONMENTAL SYSTEM

US ARMY PEO EIS
PEO Enterprise Information Systems
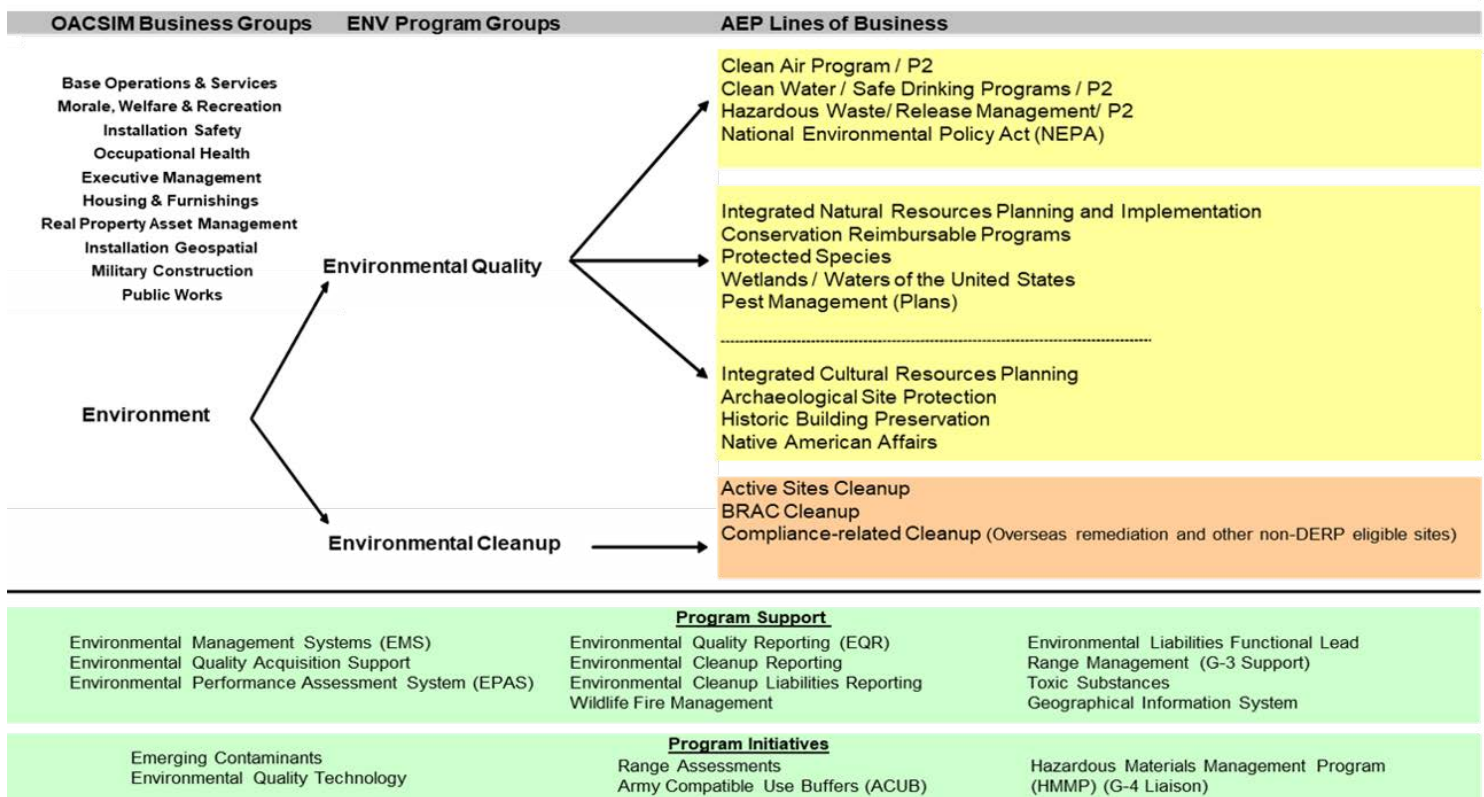

Peter J. Cloutier
Product Lead

The Army Environmental Program (AEP) reporting system that provides an Army-wide solution for accurate, reliable, and timely environmental information.

HQAES is used by the Army G-9's Environmental Division, the Army Staff proponent responsible for complying with environmental liability reporting requirements, monitoring and reporting on the performance of the Army Environmental Program (AEP), and conducting program analysis to optimize environmental cleanup and environmental quality activities.

HQAES supports championing Installation Enterprise Readiness and delivering unmatched Quality of Life to our people through Environmental Quality by providing these capabilities:

- **Environmental Compliance**
- **Environmental Conservation**
- **Environmental Cleanup**
- **Pollution Prevention**

Army Environmental Reporting improves readiness by helping provide and ensure continued access to quality training lands and facilities with minimal restrictions on operations.
