ARMY VANTAGE

Connecting the Army. Working for Soldiers.

WHAT IS ARMY VANTAGE?

A GAME-CHANGER FOR THE ARMY

Army Vantage is an enterprise data analytics platform enabling Army users at every echelon and across classification levels to view comprehensive Army-wide data, analyze trends and make data-driven decisions.

WHAT DOES ARMY VANTAGE DO?

- Supports the Army's modernization and readiness priorities
- Displays past, current and future total force data
- Produces predictive analytics
- Empowers users at every level through collaboration
- Facilitates real-time or near real-time decision making

WHO WE ARE

- A tool to help the Army leverage data as a strategic asset
- An open and extensible data management platform that can integrate data from new or legacy systems in any form, at any scale
- A key component of PEO EIS's Army Data Analytics and Platforms (ARDAP) portfolio
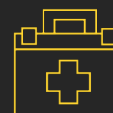

MISSION

To empower Army users with the ability to make real-time, data-driven decisions

FAST FACTS

Thousands of Army contracting officers leveraged Army Vantage in CY20 to recover an additional $1 billion in unliquidated obligations over prior years – funds that could be redeployed to more pressing Army priorities.

All major Army commands used Army Vantage's COVID-19 COPs to view and analyze data on testing capacity and re-opening risks, enabling them to make informed strategic decisions.

TOP GOALS & PRIORITIES

Leverage the Power of Information Army-Wide

- Release the Commander's Risk Reduction Toolkit and Command Toolkit across the Army
- Identify, scope and begin technical implementation of additional lines of effort in support of Senior Leader priorities
- Enhance trustworthiness of Army Vantage by ensuring analytics and dashboards are built upon domain-verified sources and logic
- Make data available to external partners through common data platform capabilities
- Continue to make data quality improvements by ensuring all data is visible, accessible, understandable and trusted
- Support process champions, domain data stewards and other subject matter experts in verifying and endorsing the data and pipeline integrations
