

Army Enterprise System Integration Program (AESIP) Hub

Enhancing Capability, Daily.

WHAT IS AESIP HUB?

INTEGRATED DATA SERVICES, VISUALIZATIONS, AND ANALYTIC TOOLS

AESIP Hub is a system of systems designed to improve Army information readiness and data agility through the management of timely and data-relevant information that enables fact-based and resource-informed decision-making by Soldiers and decision-makers across the Army leadership spectrum.

WHAT AESIP HUB DOES

AESIP Hub provides a centralized method for authoritative Army enterprise master data management. Our services, inclusive of Business Intelligence / Business Warehouse and other pertinent operational projects, increase efficiencies and evolve data capabilities by leveraging new Cloud technologies. The Hub also provides Enterprise Service Portal housing tools and applications and Identity Management (IDM) solution securing access.

WHO WE ARE

- A component of Army Data and Analytics Platforms (ARDAP)
- Army's agent of choice for business process integration activities
- Data brokers
- Cross-functional collaborators

MISSION

To provide the capability to **integrate** Army business processes by **providing a single source** for centralized master data management, business intelligence and analytics, and enterprise hub services
