

Enterprise Business Systems (EBS) – Convergence Product Office

**Enabling uninterrupted operations to
Soldiers around the world**

WHO WE ARE

EBS-Convergence is a newly established program within PEO EIS's Army Data and Analytics Programs portfolio. EBS-Convergence is part of the Army's Enterprise Business System Multi-Functional Capabilities Team (EBS-MCFT), a coalition established to drive enterprise resource planning (ERP) readiness and modernization by 2030.

WHAT IS EBS-Convergence?

EBS-Convergence will provide sweeping improvements to Army business processes across the enterprise.

Specifically, it will:

- Implement a modernized approach to Army business processes through re-engineering
- Provide force element, equipping, readiness, and deployment capabilities
- Enable procurement, human resources, technology, logistics, and finance activities

WHAT DOES THE PRODUCT OFFICE DO?

The EBS-Convergence Product Office is charged with the creation of the acquisition strategy, as well as development and deployment of the Army's modernized/converged ERP system.

MISSION

To provide a modernized warfighting capability that enables integrated and auditable sustainment operations from the strategic support area to the tactical edge of the battlefield, enabling decision making by Soldiers, the civilian workforce and leaders at echelon.

AS MILITARY AS NECESSARY.**

CONVERGED SYSTEM ROADMAP

The converged EBS system will combine the Army's Enterprise Resource Planning (ERP) programs and improve system agility, capacity, speed, and efficiency by seamlessly integrating 24 major Army capabilities across the finance and logistics enterprise. Once merged, the EBS-Convergence system will integrate with enduring systems, providing an all-inclusive view all the time.

BY THE NUMBERS

All ERPS to 1 System

EBS-Convergence will merge multiple SAP-Based ERPs into one system

More than 193K Users

The merged system will host more than 193K unique users across multiple commands

Nearly 237M Screen Clicks Annually

Combining the ERP systems will result in users accessing various modules 237M times annually
