

Army Networks Update

Mr. John Howell, APEO, Networks, Cyber & Services, PEO EIS

Federal Networks Conference | June 2, 2022

Connecting the Army.
Working for Soldiers.

Army Unified Network

Future Requirements

Developing the Future Network for Multi-Domain Operations (MDO)

The MDO-capable Army of tomorrow must have a Unified Network that enables our Army, as part of the Joint/Coalition Force, to integrate and operate simultaneously and seamlessly in all domains, all environments, across all geographies and all warfighting functions.

Unified Network Characteristics

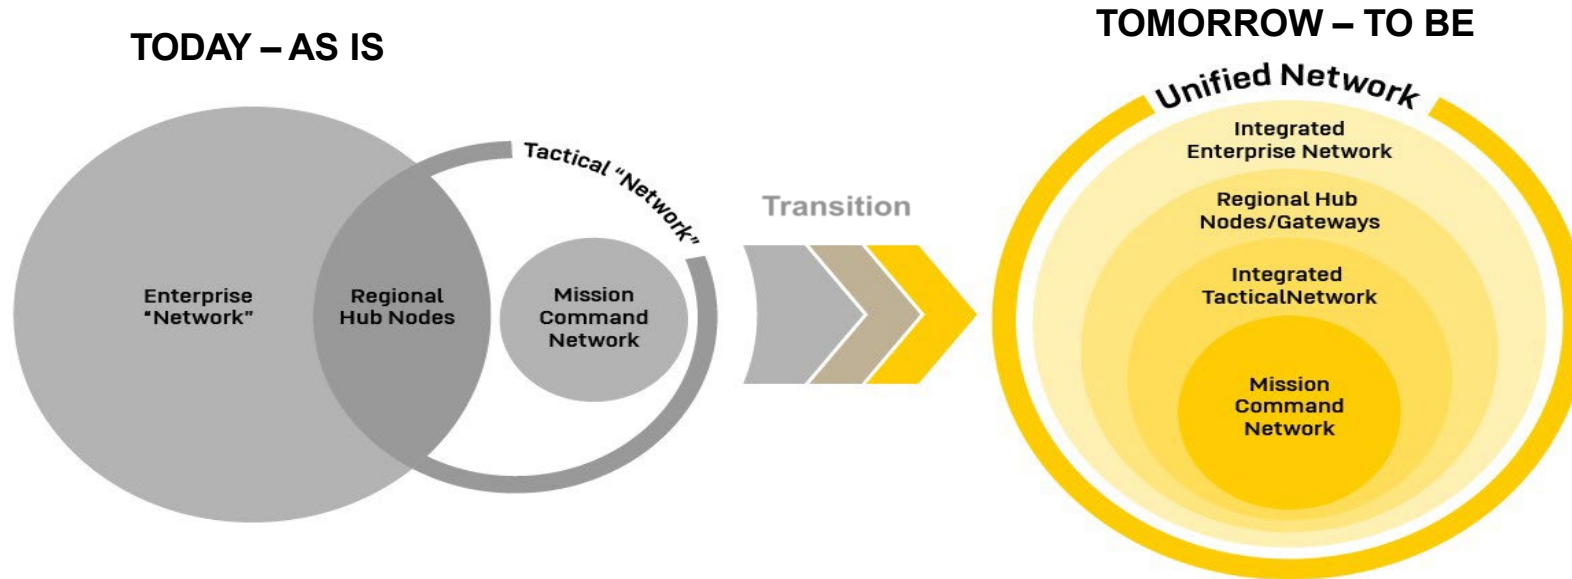

- Provides a calibrated force posture and converges capabilities at the point of need
- Extends range and increases the speed of operations for decision dominance
- Includes hardware, software and infrastructure from the forward edge of the battlefield to posts, camps and stations
- Provides a resilient, secure, global network capability and capacity to support MDO
- Aligns multiple, complex network modernization efforts into a single, coherent approach to support MDO

The “TO” in Sensor TO Shooter — Delivering Strategic Effects to the Tactical Edge

Army Unified Network: What and Why ...

Decentralized, Disjointed Network Modernization

Localized capability fielding based on organic development which lacks a standardized enterprise approach that aligns with the Integrated Tactical Network.

- **No** overarching **SIPR/MPE** Modernization Plan
- Emphasis placed on modernizing **NIPR only**, by installation
- Focused on **individual** posts, camps and stations
- **Lifecycle** process is limited to legacy technology and methods
- **Disjointed** Organizational Networks (ORGNET)
- Lacks defined requirements documentation
- RHNs serve as IEN/ITN nexus, limiting network resiliency
- Focused at the BCT maneuver level

Setting the Unified Network

Standardized capability-based modernization that merges IEN/ITN into a **Unified Network** to support MDO

- **Integrated Global SIPR** environment
- **Optimized NIPR** based on Zero Trust principles
- Focused on **horizontal delivery** of new capabilities
- **Evolutionary modernization** with new cost-effective capabilities
- **Converged DODIN-A** with single service provider and defender
- A **unified requirements** process
- Diverse transport to increase resiliency in A2/AD environment
- Enables **Corps/Division Maneuver** in an MDO fight

“IT modernization and reform is a critical measure to achieve the Army digital transformation. This includes phasing out outdated legacy systems that are incompatible or too inefficient in a fully digitized environment.” **Dr. Raj Iyer, Army CIO**

Army Unified Network Plan (AUNP)

AUNP Break-out

3 Phases

1. Set the Unified Network
 - Near-term (present - 2024)
2. Operationalize
 - Mid-term (2025 - 2027)
3. Modernize
 - Long-term (from 2028 on)

5 Lines of Effort (LOE)

1. Establish the Unified Network
2. Posture Force for Multi-Domain Operations
3. Security & Survivability
4. Reform Processes & Policies
5. Network Sustainment

How PEO EIS Supports the AUNP

Identity, Credential & Access Management

- Supports LOE Task – “Security & Survivability”
- Two ICAM Efforts:
 - Army Deputy Chief of Staff, G-6 ICAM Roadmap (Phases 1, 2)
 - ❖ Focus: Near-Term
 - Requirements Definition Package
 - ❖ Focus: Mid-Term (2025 - 2027)

Global SIPR Modernization

- Supports LOE Task – “Establish the Unified Network”
- Enablers: Commercial Solution(s) for Classified, Virtual Desktop Infrastructure (VDI), Multiple Independent Levels of Security (MILS)

Voice Modernization

- Supports LOE Task – “Establish the Unified Network”
- Intent: Attempt to reduce overall phone count, regionalize existing VOIP capabilities, implement a regional modernization approach, decommission Time Division Multiplexing (TDM) infrastructure

PEO EIS primarily supports:

- Establish the Unified Network – Enabling Multi-Domain Operations
- Posture Force for Multi-Domain Operations

PEO EIS Org Chart

Program Executive Officer
Mr. Ross R. Guckert

Acting Deputy PEO
Mr. Marty Zybura

Acting Chief of Staff
Mr. Ken Wojcik

Acting Plans & Operations
Mr. Jim Alexander

Acquisition Innovation Directorate
Mr. Aric Sherwood

Business Management
Mr. Michael McCaffery

Human Resources
Mr. Steven Uehling

Acquisition Logistics & Property Management
Mr. Lawrence Silas

Cyber
Mr. Marish Patel

Strategic Communication
Ms. Tara Clements

BUSINESS MISSION AREA

Assistant PEO - Business Mission Area
Mr. Lee James III

PM ARDAP

Army Data and Analytics Platforms

COL Robert Wolfe
Project Manager

PM DIBS

Defense Integrated Business Systems

COL Donald Burton
Project Manager

PM IPPS-A

Integrated Personnel and Pay System - Army

COL Robert Williams
Project Manager

LTC LJ Freeland
Product Manager
Army Data Platform

LTC Christee Cuttino
Product Manager
Army Contract Writing System

LTC Corris Bullock
Product Manager
IPPS-A Increment II

Mr. Keith Baylor
Product Lead
Automated Movement & Identification Solutions

LTC William Reker
Product Manager
Global Combat Support System - Army

Mr. Steven Reichard
Acting Product Lead
Medical Communications for Combat Casualty Care

Mr. James Winbush
Product Lead
Logistics Information Systems

Mr. Reginald Shuford
Product Director
General Fund Enterprise Business System

Mr. Sajjan (Saj) George
Product Lead
Reserve Component Automation Systems/Force Management System

Mr. JT Craft
Product Lead
Global Force Information Management

Mr. Gabriel Saliba
Product Director
Logistics Modernization Program

Mr. Michael Payne
Product Director
Army Human Resource Systems

Mr. Preston Hayward
Product Lead
Enterprise Business Systems - Convergence

Mr. Timothy Hale
Product Manager
Army Training Information System

*Works directly for the PEO

ENTERPRISE INFORMATION ENVIRONMENT MISSION AREA

Assistant PEO - Networks, Cyber & Services
Mr. John Howell

PM IEN

Integrated Enterprise Network

COL Justin Shell
Project Manager

PM DCO

Defensive Cyber Operations

COL Mark Taylor
Project Manager

PD ES

Enterprise Services

Mr. Sergio Alvarez
Acting Project Director

LTC Scott Davis
Product Manager
Wideband Enterprise Satellite Systems

LTC Dakota Steedsman
Product Manager
Cyber Analytics & Detection

Mr. Boyd Williams
Product Director
Acquisition, Logistics & Technology Enterprise Systems & Services

LTC Xkoshan Arnold
Product Manager
Global Enterprise Network Modernization - Americas

LTC Bradley Son
Product Manager
Cyber Platforms and Systems

Mr. GW Burnside II
Product Lead
Army Enterprise Staff Management System

Mr. Thomas Dunaway
Product Manager
Global Enterprise Network Modernization - OCONUS

Mr. Arthur Edgeson
Product Lead
Applied Cyber Technologies

Mr. Brent Thomas
Product Lead
Human Resource Solutions

Mr. EJ Wasikowski
Product Lead
Land Mobile Radio

Mr. John Swart
Product Lead
Technology Applications Office

Mr. Wayne Sok
Product Lead
Computer Hardware, Enterprise Software & Solutions

Mr. Brian Bricker
Acting Product Lead
Allied Information Technology

Mr. Palmer Mitchell
Product Lead
Enterprise Computing

Ms. Deidra McCaskill
Product Lead
Enterprise Content Collaboration & Messaging
