

Army Data and Analytics Platforms (ARDAP)

INNOVATIVE DATA OPERATIONS FOR THE ARMY

WHAT IS ARDAP?

ARDAP is a portfolio of systems that will modernize Army business processes and enable scalable, agile and trusted data platforms integrated with data services/applications, visualization and analytic tools to facilitate fact-based and resource-informed decision-making.

WHAT DOES ARDAP DO?

- Collects, catalogs, integrates, analyzes and visualizes data from disparate source systems to support data sharing across the Army, as well as Joint partners.
- Ensures that data is Visible, Accessible, Understandable, Linked, Trusted, Interoperable, Secure (VAULTIS).
- Provides data to enable warfighter mission accomplishment in a multi-domain environment.

WHO WE ARE

- A portfolio of programs designed to support Soldier readiness by using data systems and software that deliver quality at speed.
- A nesting place of integrated data that allows Soldiers, civilians, and decision-makers to make faster and more accurate data-driven decisions at the point of need.
- A project office dedicated to delivering rapid capability that is valuable, scalable and sustainable.

MISSION

To provide data that enables
WARFIGHTER MISSION ACCOMPLISHMENT

FAST FACTS

Provides data and analytics to nearly **20** customer and stakeholder organizations

Supports more than **2 million** Soldier, civilian and contractor users

Supports key tenets of the Army's **DATA STRATEGY** to innovate data operations and increase agility

ARDAP PROGRAMS

ARDAP STARTS WITH DATA....

DETERMINE MISSION REQUIREMENTS - SOLDIERS, EQUIPMENT & SUPPLIES

TRAINING THE ARMY

MOVE & TRACK EQUIPMENT, SOLDIERS, AMMUNITION & SUPPLIES

SEE & MANAGE SOLDIERS AND EQUIPMENT READINESS

...AND ENDS WITH WARFIGHTER MISSION ACCOMPLISHMENT

ARDAP
ARMY DATA AND ANALYTICS PLATFORMS

PROGRAM / MISSION

Will collect, catalogue, integrate, analyze and visualize data from disparate source systems to support fact-based and resource-informed decision-making for Army senior leaders and the warfighter.

To be the premier, one-stop training solution for the Total Force.

To provide a modernized warfighting capability that enables integrated and auditable sustainment operations from the strategic support area to the tactical edge of the battlefield, enabling decision-making by Soldiers, the civilian workforce and leaders at echelon. - *As Commercial as Possible, as Military as Necessary*

Provides authoritative integrated and interoperable transactional capability for global force management activities, automates the Army's Deploy to Redeploy and Retrograde (D2RR) business processes, and provides Global Force Management Data Initiative (GFM-DI)-compliant data to man, equip, train, ready and resource the Army.

Responsible for acquisition program management of assigned logistics information systems and the execution of post-deployment lifecycle sustainment within cost, schedule and performance.
