

ENTERPRISE BUSINESS SYSTEMS – CONVERGENCE (EBS-C)

ARMY BUSINESS MODERNIZATION AND TRANSFORMATION

WHO WE ARE

Enterprise Business Systems – Convergence (EBS-C) is a project office within PEO EIS that supports Army business system modernization and is focused on market research and prototyping. EBS-C is supported by the Army's Enterprise Business System Multi-Functional Capabilities Team (EBS-MFCT), a coalition of functional representatives driving requirements for enterprise resource planning readiness and modernization by 2032.

WHAT IS EBS-C?

EBS-C will provide sweeping improvements to Army business processes across the enterprise. Specifically, it will:

- Re-engineer business processes against commercial best practices to reduce customization and related costs
- Streamline the logistics supply chain across numerous classes of supply
- Serve as the Army's authoritative source for financials and auditability
- Provide a solution that can adapt to changing conditions at the speed of conflict

WHAT DOES THE PROJECT OFFICE DO?

The EBS-C project office is charged with the creation of the acquisition strategy, as well as development and deployment of the Army's modernized/converged ERP system.

**AS COMMERCIAL AS POSSIBLE.
AS MILITARY AS NECESSARY.**

MISSION

To provide a **modernized warfighting capability** that enables integrated and auditable sustainment operations from the strategic support area to the tactical edge of the battlefield, enabling decision-making by Soldiers, the civilian workforce and leaders.

CONVERGED SYSTEM ROADMAP

The converged enterprise business system solution will combine the Army's Enterprise Resource Planning (ERP) programs and improve system agility, capacity, speed and efficiency by seamlessly integrating 24 major Army capabilities across the finance and logistics enterprise. As the Army modernizes, EBS-C will provide a single authoritative system of record to provide true data reliability, transparency, auditability, tactical and strategic readiness, while reducing ownership costs.

BY THE NUMBERS

5 Army ERPs become 1 System

EBS-Convergence will merge multiple ERPs into one system.

More than 200K Users

The merged system will host more than 200K unique users across multiple commands.

Nearly 237M Screen Clicks Annually

Combining the ERP systems will result in users accessing various modules 237M times annually.
