

Army Data and Analytics Platforms (ARDAP)

INNOVATIVE DATA OPERATIONS FOR THE ARMY

WHAT IS ARDAP?

ARDAP is a portfolio of systems that will modernize Army business processes and enable scalable, agile and trusted data platforms integrated with data services/applications, visualization and analytic tools to facilitate fact-based and resource-informed decision-making.

WHAT DOES ARDAP DO?

- Collects, catalogs, integrates, analyzes and visualizes data from disparate source systems to support data sharing across the Army, as well as Joint partners.
- Ensures that data is Visible, Accessible, Understandable, Linked, Trusted, Interoperable, Secure (VAULTIS).
- Provides data to enable warfighter mission accomplishment in a multi-domain environment.
- Develop, integrate, test, deliver, operate, and maintain an enterprise capability for the Army training and education communities

WHO WE ARE

- A portfolio of programs designed to support Soldier readiness by using data systems and software that deliver quality at speed.
- A nesting place of integrated data that allows Soldiers, civilians, and decision-makers to make faster and more accurate data-driven decisions at the point of need.
- A project office dedicated to delivering rapid capability that is valuable, scalable and sustainable.

MISSION

To provide data that enables
WARFIGHTER MISSION ACCOMPLISHMENT

FAST FACTS

Provides data and analytics to nearly **20** customer and stakeholder organizations

Supports more than **2 million** Soldier, civilian and contractor users
