APPROVED FOR PUBLIC RELEASE
AKO is being modernized and rebuilt based on the Adobe Experience Manager (AEM) platform including but not limited to the following AEM products:

- **AEM Sites** – an easy to use tool to author, manage, deliver content and personalize experiences across all channels including mobile devices and responsive design.
- **AEM Assets** – provides flexible workflows and tagging to produce and manage content efficiently for AKO.
- **AEM Communities** – provides a collaboration capability for user groups enabling those users to tailor their space to a variety of specific needs based on available components.
- **Adobe Analytics** – allows for the collecting, organizing, analyzing and reporting on everything end users do.
- **Adobe Target** – permits the identification of AKO’s best content in order to deliver the right experience to the right customer.

PEO Perspective March 2019

Women's History Month began as Women's History Week in 1978, a municipal celebration in Santa Rosa, California, highlighting women's historical and cultural accomplishments. In 1980, a consortium of women's groups and historians succeeded in elevating national recognition. In February 1980, President Jimmy Carter issued the first Presidential Proclamation declaring the week of March 8, 1980, as National Women's History Week. It wasn’t until 1987, when Congress, realizing that just a week wouldn’t do justice to the breadth of women’s contributions to the fabric of our nation, passed Public Law 100-9, designating March as “Women’s History Month.”

And what a long way we’ve come, both in our nation’s history and in our Army.

Every March we pause and take the opportunity to celebrate the contributions of female soldiers, Army civilians and contractors in the defense of our great nation, and I would be remiss if I didn’t highlight some of the women leaders at PEO EIS who continue to inspire and achieve greatness.

Among these are: Debra Lee, Director, Human Resources; Tara Coates, Director, Strategic Communications; Michele Walker, Acting/Interim Deputy for Acquisition and Systems Management; Nancy Roberts, Product Lead; Army Enterprise Systems Integration Program (AESIP), Holl, Heather Putnam, Acting Product Director, General Fund Enterprise Business System (GFES) Development and Modernization; Lt. Col. Christine Youngquist, Product Manager, Acquisition Management Support Solutions AND Action/Project Manager, GFES - Sensitive Activities; Lt. Col. Lawrence Amato, Project Manager, Integrated Personnel and Pay System-Army (IPPS-A) Increment II, Col. Lisa Eldred Ferguson-Amechee, Product Manager, Cyber Analytics & Detection (CAD), Sarah Beardsley, Product Lead, Enterprise Content Collaboration and Messaging (EC2M), Lauren Adams, Product Lead, Headquarters Army Environmental System (HAES); Judith Avery, Acting Deputy Project Manager, AESIP; and Patricia Osier, Deputy Project Manager, IPPS-A.

We are grateful to all of the dedicated and talented women across PEO EIS working for our nation and on behalf of Soldiers — your dedication and wisdom guide us to success every day.

At a Twilight Tattoo reception last year, Under Secretary of the Army Dr. Drayton McCarthy spoke about the importance of investing time in establishing personal relationships with legislators. He recognized the need for understanding among congressional members and their committees in the complex issues facing the Army is good for the Army and for our nation.

Last month, PEO EIS hosted a delegation of professional staff members from the House Appropriations Committee – Defense (HAC-D) at our headquarters in Fort Belvoir for an overview of our portfolio and a series of briefings focusing on the Army Leader Dashboard (IPPS-A) and, Offensive Cyber Operations. Building relationships with Congress is critical to our being able to deliver cutting-edge, innovative and revolutionary solutions to Soldiers who help them to accomplish their missions.

On the first day of March, it was my distinct pleasure to host a ceremony promoting Acting Deputy PEO Brendan Burke to the Senior Executive Service. Only the best are selected for the honor of appointment to the SES, and it is one by the confirmation of the Secretary of the Army that these professionals achieve the position.

It takes a level of expertise and power to achieve the highest levels of public service. In this position, Mr. Burke not only must bear the weight of the nearly 20 years of government experience in all areas of technology management and development. The Army has made an excellent choice, and I couldn’t be more proud.

Congratulations to our new SES, Mr. Brendan Burke!

I hope you will also join me in congratulating Billy McCann of GCSS-Army, recipient of the 2018 Defense Acquisition Workforce Individual Achievement Award for Life Cycle Logistics.

This award is an incredible honor, and is recognition of Billy’s great work as the product support manager for GCSS-Army. Billy led a team of 110 personnel through the movement of more than 20,000 Army units to the new system, converting all property valued at over $3.5 billion; issuing more than one million training certificates, and finishing nearly 12,000 Sandia terminals. Billy was also selected as the Army Acquisition Executive’s Leadership Logistical of the Year in 2018, and he continues to impress.

On March 13, the Product Manager Whitehead Enterprise Subsystem (PDM WESS) part of the Project Manager Defense Communications and Army Transmission Systems (PM DCATS) portfolio, takes part in an historic event as they launch the Whitehead Global SATCOMs 10001-10 in partnership with the Air Force, the United Launch Alliance and Boeing, to deliver enhanced, high-capacity satellite communications capabilities to Soldiers and others around the world.
AKO 2.0 Priorities

- Migrate AKO 2.0 to a Cloud Hosted Environment
- Continued communities development/support to organizations
- Continuous portal development and enhancements leveraging Agile best practices
- Integration of AEM Campaign and Live Fyre
EAMS-A Overview

Network Infrastructure

Impact EAMS-A Service: DNS/OCSP

Future Services: GCDS (WAF, VDSS)

Army Users

Authentication / Authorization

Army Applications

Authentication / Authorization

Limited WAF

Army Applications (GFEBS, GCSS-A, TMT)

APLAN BPM migrating to Service Now

EC2M SIA Process

Customers request EAMS-A Service (SSO/LDAP)

NIPR/SIPR requests both on NIPR

AKO LDAP-AMID 1.0 with all DoD AMID 2.0 Persona based versus person based

Army Master Identity Directory (AMID)

Features:
• Provide Attributes per record
• One attribute is user status (Provisioned/De-provisioned)

EC2M MFA Process

Customers manage their Identity Record

NIPR Only

AKO Portal 1.0 migrating to Service Now

Features:
• Create a Non-CAC record
• Change/Reset Password
• Sponsorship (Non-US Citizen w or w/o CAC)
• MFA Token Association (e.g. Yubikey)

EAMS-A and AMID 1.0 exist on SIPR to support SIPR applications

*OCSP - Online Certificate Status Protocol
